Maximum free fall height to EN 1176: **260cm**
Essential protective area: 65m²
Recommended ground surface:
40 cm of 2/8 mm pea gravel
for fall protection, coarse sand,
wood chips or HIC- tested synthetics.

Fitness equipment must be separated from general play areas in children's playgrounds (EN 1176) by means of appropriate spacing, fencing, or other structural measures. Otherwise, testing in accordance with EN 1176 is necessary, which may result in a greater fall height and thus also a larger protective area and a change in the fall protection material.

When selecting color gradients, the corresponding shades are numbered from top to bottom.
Powder coatings are offered in corrosivity category C3 as standard. For playground equipment in areas prone to corrosion, such as near the sea, in swimming pools, near industrial plants, cultivated agricultural land, or salt deposits, we recommend the more resistant class C5.
